DIGITAL HEARTS HOLDINGS Co., Ltd.

AGEST announces the establishment of "AGEST DX Solution Center" utilizing domestic and international Advanced DX Human Resources ~Strengthening "In-house DX system development support service" to provide hybrid DX system development support service~

AGEST, Inc. (hereinafter referred to as "AGEST"), a subsidiary of DIGITAL HEARTS HOLDINGS Co., Ltd., announces that in order to support customers' DX system development support, AGEST fully developed the "In-house DX system development support service" to provide hybrid DX system development support through the establishment of the "AGEST DX Solution Center" in Hanoi, the capital of Vietnam, which recruits high-level DX human resources by our group company LogiGear.

Recently, while more and more companies are actively promoting the use of DX to improve business efficiency and accelerate corporate growth, the increasing sophistication of technology, the shortage of DX human resources, etc. are becoming social issues.

Considering that customer demands for AGEST are also expanding into the area of DX system development and support in addition to software testing to ensure product quality and safety, we will begin the "In-house DX system development support service" to support customers' DX system development.

DIGITAL HEARTS HOLDINGS Co., Ltd.
Tokyo Opera City Bldg. 41F, 3-20-2 Nishi-Shinjuku, Shinjuku-ku, Tokyo
163-1441, Japan

"In-house DX system development support service" will provide one-stop services ranging from consulting to support for the formation of customers' in-house development system, development support, and operation and maintenance, by leveraging its strengths: a high-quality service that combines consulting by DX specialist consultants with extensive domestic and international networks and a wealth of practical experience, design by AGEST Group's highly skilled DX human resources in compliance with international standard quality control processes, and software testing by QA engineers who have cutting-edge quality technologies.

Moreover, tailoring to customer needs, we will realize the provision of hybrid DX system development services that satisfy both cost reduction and high quality by creating a hybrid of on-site development and global development utilizing advanced DX human resources in Vietnam.

This establishment of the "AGEST DX Solution Center", an organization specializing in DX system development, as well as the business alliance with JDXP(Japan Digital Transformation Partners), the Consortium of Vietnamese DX venture companies, which was concluded in 2022, will enable AGEST to further strengthen its advanced DX development structure as a group and support advanced system development including DX in Japan and other Asian countries.
