1. Qualitative Information on Quarterly Financial Results

(1) Explanation of Operating Results

During the three months ended June 30, 2023, the global economy was relatively stable due to an easing in the pace of policy rate hikes in the U.S. and Europe, rebound demand in the services sector, and support for the economy through consumer spending. However, the future business climate remains uncertain due to upward pressure on wages against the backdrop of a tight labor supply and demand in Europe and the U.S., continued price hikes due to demand recovery, concerns of recession in the U.S. economy due to persistently high policy interest rates, and a decline in the momentum of economic recovery in China after the lifting of the zero COVID policy due to sluggish real estate market conditions and falling exports. In the manufacturing industry, signs of recovery from semiconductor and raw material procurement difficulties were seen, but the industry remained sluggish due to the dissipation of stay-at-home consumption and the effects of inventory adjustments in the market. In addition, the yen depreciated against the U.S. dollar due to continued differences in monetary policies between Japan and the U.S.

In the electronic components industry, the car electronics market is expected to recover moderately as the shortage of semiconductors eases, but a strong recovery is yet to be seen due to inventory adjustments and other factors. In the ICT market, sales of smartphones, tablets, and other devices remained sluggish due to the prolonged replacement cycle, the dissipation of the special demand seen during the COVID-19 pandemic, and uncertainty about the economic outlook. In the home appliance market, sales of cooking appliances, air purifiers, and other devices were weak due to a reactionary drop after the special demand seen during the COVID-19 pandemic and a shift to service consumption, while sales of energy-saving home appliances such as air conditioners grew. The industry market expanded due to a recovery in economic activity and increased demand mainly for EVs and semiconductor-related products.

As a result of the Company's thorough stable procurement of materials, along with maintaining a stable supply of products to enable immediate response to customer demand, as well as the aggressive introduction of new products and cost reduction efforts, in the three months ended June 30, 2023, net sales amounted to \$11,038 million (12.5% decrease year on year), and operating loss was \$385 million (compared to operating profit of \$216 million in the same period of the previous fiscal year). Ordinary profit was \$694 million (60.8% decrease year on year) with foreign exchange gains of \$875 million recorded due to the depreciation of the yen, and profit attributable to owners of parent was \$520 million (65.9% decrease year on year).

Results by segment are as follows.

[CS Division]

In the car electronics market, sales of connectors exceeded those of the same period of the previous fiscal year due to steady expansion in electrical components and other devices, despite a decrease in camera-related products due to inventory adjustments. In the home appliance market, sales of game console-related products expanded favorably and exceeded those of the same period of the previous year. On the other hand, in the ICT market, sales remained sluggish due to continued inventory adjustments in tablet-related products for U.S. customers. Smartphone-related demand also contracted due to a drop in replacement demand, inflation, and uncertainty over the global situation, resulting in a year-on-year decline in CS Division as a whole.

As a result, net sales of CS Division amounted to \(\frac{\text{\frac{4}}}{4},720\) million (7.7\% decrease year on year), and operating profit was \(\frac{\text{\frac{45}}}{45}\) million (84.7\% decrease year on year).

[SCI Division]

In the car electronics market, sales of camera modules, control units, etc. shrank due to the lack of a full recovery in automobile production as well as the impact of inventory adjustments by customers. In addition, sales of touch sensors were less than those of the same period of the previous fiscal year, affected by the discontinuation of production of models that use such sensors. In the remote control business, the mainstay of the home appliance market, which accounts for a large proportion of SCI Division, sales of remote control units for sanitation and air conditioners expanded, but sales of smart home appliances units and home

equipment units shrank due to inventory adjustments, resulting in a year on year decline in sales in SCI Division as a whole.

As a result, net sales of SCI Division amounted to \(\frac{\pm}{4}\)6,215 million (16.2% decrease year on year), and operating loss was \(\frac{\pm}{3}\)77 million (compared to operating loss of \(\frac{\pm}{3}\)0 million in the same period of the previous fiscal year).

[Research & Development Center]

Regarding Bluetooth® modules, the central product of Research & Development Center's mainstay wireless communication module businesses, sales for payment terminals decreased year on year, but sales for mobile printers and medical devices were strong. In addition, sales of Sub-GHz RF modules for lighting equipment also expanded, and sales of Research & Development Center as a whole exceeded those of the same period of the previous fiscal year.

As a result, net sales of Research & Development Center amounted to ¥96 million (10.1% increase year on year), and operating loss was ¥54 million (compared to an operating loss of ¥50 million in the same period of the previous fiscal year).

(2) Explanation of Financial Position

Current assets increased 4.8% from the end of the previous fiscal year to \(\frac{4}{34}\),839 million. This was mainly due to increases of \(\frac{4}{804}\) million in cash and deposits, and \(\frac{4}{513}\) million in raw materials and supplies. Non-current assets increased 2.8% from the end of the previous fiscal year to \(\frac{4}{23}\),767 million. This was mainly due to an increase of \(\frac{4}{588}\) million in investments and other assets.

As a result, total assets increased 4.0% from the end of the previous fiscal year to \\ \frac{\cup}{5}\)8,606 million.

Current liabilities increased 11.4% from the end of the previous fiscal year to \$18,036 million. This was mainly due to an increase of \$1,577 million in short-term borrowings. Non-current liabilities decreased 1.3% from the end of the previous fiscal year to \$7,796 million. This was mainly due to a decrease of \$239 million in long-term borrowings.

As a result, total liabilities increased 7.2% from the end of the previous fiscal year to \(\frac{\text{\$\text{\text{\$\text{\$\text{\$\text{\$}}}}}}{25,833}\) million. Total net assets increased 1.5% from the end of the previous fiscal year to \(\frac{\text{\$\tex{

(3) Explanation of Consolidated Financial Results Forecast and Other Forward-looking Information
After considering financial results for the first quarter and future business trends, the consolidated
financial results forecasts for the six months ending September 30, 2023 and the fiscal year ending March 31,
2024, announced on April 28, 2023, have been revised. Please refer to the "Notice Concerning Revisions to
First Half and Full Year Financial Results Forecasts" released today (July 26, 2023) (available only in
Japanese) for matters related to these forecast figures.

The foreign exchange rate on which the results forecast is made for the second quarter and thereafter is assumed to be ± 130 per US dollar.
