GLP J-REIT aims to distribute the gain on sale of assets to unitholders as dividends by analyzing the size and specifications of property, the lease agreement status and the location of property and selling assets at the appropriate timing and price.

In terms of stability and growth potential, the focus on logistics real estate remains strong. Capturing the robust demand for logistics real estate, the Sale was implemented at a sale price that is 40% higher than the appraisal value, and the gain on sale is expected to be 2,173 million yen (Note 1). The proceeds from the Sale will be used to distribute the gain on sale to unitholders as dividends, as well as in various

measures that will enhance value for unitholders according to market conditions, such as funds to acquire properties in the future.

GLP J-REIT will distribute unrealized gains to unitholders through strategic and timely property sales by taking advantage of abundant unrealized gain of 284.8 billion yen (Note 2) and leveraging largest number of properties among logistics J-REIT.

The appraiser took this approach by taking into account the following factors; 1) the fact that the real estate investors tend to use income approach for real estate valuation, 2) the reason for GLP J-REIT as a real estate investor to obtain the appraisal of this property, and 3) the fact that the property is classified as a rental asset for investment. Although this appraisal sought a value that represents the investment profitability value, which takes the management method based on the investment corporation regulations as given, the type of the price will be the normal value since the price matches the fair value that represents the market value (normal value).
