4. Reason for Changing the Corporate Name

In its efforts to contribute to the resolution of challenges in remote island healthcare, FPG Air Services provides a service for transporting medical professionals (primarily doctors) to remote islands in Kagoshima and Okinawa Prefectures. Furthermore, leveraging its scarce licenses and expertise in the aviation sector, FPG Air Services is making specific preparations to expand into the private jet business targeting our group's customer base, particularly high-net-worth individuals, with the introduction of a business jet, "HondaJet." With the entry into the private jet business, FPG Air Services has decided to change its corporate name to clearly express its intention to provide personalized and attentive air travel that aligns with the schedules and usage scenarios of the users, exclusively tailored "Only for you."

Please be noted that even after advancing into the private jet business, the aviation transport service supporting healthcare in remote and island areas will continue, and we will continue to strive for contributions to the local communities.
