[Monthly comment]

In September, net sales totaled 107.8% for existing stores compared with the previous year and 117.7% for all stores.

Due to factors including favorable sales of apparel driven by both autumn and summer apparel given the drop in temperature in the latter half of a month which saw consistently high temperatures compared with the previous year, favorable sales of brand items capturing inbound demand and favorable sales of home appliances with increased sales of air conditioners, refrigerators and other items, sales for both existing stores and all stores increased year on year.
