2. Reason for the revision

Regarding the consolidated results for the six months ended September 30, 2023, profit at each stage is expected to exceed the forecast and the previous fiscal year’s results. Despite price increases unable to fully offset the impact of rising raw material costs and other factors as well as sales of hams and sausages and other processed foods falling short of plans, the vendor business performed well. The Company is currently closely examining the full-year consolidated financial results forecast, and will provide explanations on the forecast on October 31, 2023 together with the announcement of its consolidated financial results for the six months ended September 30, 2023.

(Note) The financial results forecast above is made based on information currently available to the Company. Actual results may vary from the expected figures due to various factors in the future.
