Notice Concerning Domestic Project Acquisitions and Leasing

Canadian Solar Asset Management K.K. (the “Asset Manager”) as the entrusted asset manager of Canadian Solar Infrastructure Fund, Inc. (“CSIF”), hereby announces its acquisition and leasing plan for solar energy project (“Anticipated Acquisitions”).

The lessee of the Anticipated Acquisitions is not a related party (the “Related Parties”) under the Act on Investment Trust and Investment Corporation (1951, No. 198, including revisions thereafter) (the “ITA”), however, the lessee is a related party (the “Related Party”) under the Asset Manager’s related-party transaction rule. Also, the sellers of the Anticipated Acquisitions are not Related Parties under the ITA or a Related Party under the Asset Manager’s related-party transaction rule. However, since this Anticipated Acquisitions was developed and owned by Sponsor Group (Note), etc, the Asset Manager follows the decision-making procedures in accordance with the related-party transaction rule and other internal rules and obtains the consent of CSIF based on the board of directors’ meeting of CSIF held today, in order to conduct the asset acquisition transactions with the sellers for the acquisition of Anticipated Acquisitions and make a lease that constitutes a related party transaction.

1. Summary of Acquisition

Asset number (Note 1)	Classification	Project name	Location (Note 2)	Anticipated acquisition price (¥ million)	To be acquired from
S-31	Solar energy facilities, etc.	CS Yamaguchi-shi Power Plant	Yamaguchi-shi, Yamaguchi	230	CS Yamaguchi Aio Futajima G.K.
Total			-	230	-

(Note 1) Asset number is assigned to the projects to be acquired, based on the classification of the renewable energy power generation facility. “S” denotes a solar energy project.

A “renewable energy power generation facility” collectively refers to a renewable energy power generation facility and real estate required for installation, maintenance and operation of renewable energy power generation facilities or the lease right (including sublease rights) or surface rights of such real estate. In addition, a “solar energy facility” collectively refers to real estate (including sublease rights) required for installation, maintenance and operation of solar power generation facilities or the lease rights or surface

rights of such real estate, in addition to power generation facilities (this refers to, among other things, renewable energy power generation facilities that use sunlight as an energy source; the same applies herein).

The same applies herein.

(Note 2) Based on the land or parcel of land upon which the solar energy facility is located, as described in the property registry. The address is described down to the city or district level.

(Note 3) This column lists the seller of the solar energy facilities. CSIF plans to acquire ownership of the land from CS Mie Yamada G.K.

(1) Execution Date of Purchase Agreements	November 28, 2023
(2) Acquisition Date	December 1, 2023 (anticipated)
(3) Acquired From (Seller)	Please refer to section “4. Summary of Seller”.
(4) Acquisition Funds	Cash at hand
(5) Settlement Method	Full amount to be paid on the Acquisition Date (anticipated)
(6) Intermediary	None

2. Reasons for the Acquisition and Leasing

CSIF will acquire these assets with the expectation to improve CSIF’s unitholder value that the increased number of assets under management after the acquisitions will lead to more stable cash flows and a more geographically diverse/diversified portfolio, as well as a larger market capitalization that will enhance liquidity in the capital markets. CSIF manages its portfolio assets by leasing them in order to satisfies the conduit requirements. As with its owned portfolio assets, CSIF intends to realize long-term stable cash flows from the Anticipated Acquisitions by only engaging in the generation and sale of electricity and by using a bankruptcy remote SPC, which has taken measures to reduce the possibility of bankruptcy, as the lessee. The assets to be acquired are a renewable power plant that conform to the asset management targets and policies as stated in CSIF’s certificate of incorporation. Lessees under the renewable energy power plant lease agreements satisfy the criteria for selecting operators.

3. Details of Anticipated Acquisition

(1) Summary of Anticipated Acquisition

The table below is an individual summary of Anticipated Acquisition. Please refer to the following for definitions used in each individual summary. Stated information is as of November 28, 2023, unless separately indicated in a footnote.

And also, because the Anticipated Acquisitions satisfy the criteria, we are not required to obtain an opinion on the “Profitability and Continued Profitability of the Infrastructure Asset” under the rules and regulations of initial public offerings of the Tokyo Stock Exchange, so the opinion has not been obtained.

a) “Anticipated Acquisition Price” Column

“Anticipated Acquisition Price” for the project to be acquired is based on anticipated acquisition price as described in the purchase agreements (excluding acquisition expenses such as the payment of outsourcing service fees related to acquisition, property-related taxes, urban planning taxes, consumption taxes and other fees).

b) “Location” Column

“Location” for the project to be acquired is based on the land or parcel of land upon which the solar energy facility is located, as described in the property registry.

c) “Land” Column

- “Lot number” is as stated in the property registry.
- “Region use” refers to the type of areas listed in Item 1 of Article 8, Paragraph 1 of the Urban Planning Act (No. 100 of 1968, including subsequent amendments) (herein after referred to as the “City Planning Law”) or the type of area listed in Article 7 of the Urban Planning Act. Regions that are designated as city planning areas but not classified in the classifications listed in Article 7 of the Urban Planning act are stated as “Non-line City Planning Area” and regions that are not designated as city planning areas are stated as “Outside City Planning Area,” respectively.
- “Area” is as stated in the property registry and may not match the current status.
- “Ownership Structure” is the type of rights that CSIF plans to hold in relation to the land upon which the solar energy facility is located.

d) “Facility” Column

- “Frame Structure” refers to the module frame structure of the solar energy facility to be acquired as described in the technical report received from E&E Solutions, Inc.
- “Certification Date” refers to the date on which the solar energy facility to be acquired received certification in accordance with Article 9, Paragraph 3 of the Renewable Energy Special Measures Act as revised by the Act for revising a part of the Special Measures Concerning Procurement of Renewable Energy Electricity by Electric Utilities (Act No. 59 of 2016).
- “COD” refers to the date on which the solar energy facility to be acquired began operating (not test operating) and supplying renewable energy as set forth in the Power Purchase Agreements.
- “Panel Type” refers to the element of photovoltaic module (“PV module”) of the solar energy facility to be acquired as described in the technical report received from E&E Solutions, Inc.
- “Panel Output” refers to the maximum PV module output of the solar energy facility to be acquired as described in the technical report received from E&E Solutions, Inc.
- “Number of Panels” refers to the number of PV modules installed in the solar energy facility to be acquired as described in the technical report received from E&E Solutions, Inc. or the Energy Yield Report received from TÜV Rheinland Japan, Ltd.
- “Output Capacity” is the lesser of the PV module capacity or the PCS capacity of the solar energy facility to be acquired as described in the technical report received from E&E Solutions, Inc. However, Anticipated acquisition operated under constant power factor control. In this release, Output Capacity before constant power factor control are shown for these assets. The figures for these assets shown in the individual summary of Anticipated Acquisitions below are the figures as of November 28, 2023. The power factor constant control figures may be changed at any time in the future in response to requests from Chugoku Electric Power Transmission and Distribution Co., Inc.
- “Ownership Structure” is the type of right that CSIF plans to hold regarding the solar energy facility to be

acquired.

- “Panel Manufacturer” is the panel manufacturer of the solar energy facility to be acquired as described in the technical report received from E&E Solutions, Inc. “Canadian Solar Group” refers to the consolidated group with Canadian Solar, Inc. (headquartered in Canada) as the ultimate parent and to which Canadian Solar Projects K.K. (the “Sponsor”) belongs.
- “Panel Model” refers to the model type of the solar energy facility to be acquired as described in the technical report received from E&E Solutions Inc., or the Energy Yield Report received from TÜV Rheinland Japan, Ltd.

e) “Operator” Column

“Operator” is the operator of the project to be acquired as of the anticipated acquisition date.

f) “O&M Servicer”

“O&M Servicer” refers to the main O&M servicer of each of CSIF’s projects to be acquired under the valid O&M outsourcing agreement as of the anticipated acquisition date of each project.

“CSOM Japan” is the abbreviation for Canadian Solar O&M Japan K.K. The same applies herein.

g) “Summary of Specific Contracts” Column

“Power Generation Company,” “Purchase Price” and “Electric Power Purchasing Company” indicate the details of specific agreements scheduled to be effective on an anticipated acquisition date of each Anticipated Acquisition Asset. Note that “Purchase Price” excludes the amount of consumption tax and local consumption tax. The income of Power Generation Company under the specific agreement by the “Purchase Price” is not equal to the income for CSIF.

h) “Special Notes” Column

“Special Notes” are important points that are to be noted relating to rights and use of each project, valuations, profitability and liquidity based primarily on information as of November 28, 2023.

i) “Summary of Lease of Facilities, etc.” Column

- “Summary of Lease of Facilities, etc.” describes the content of the valid power generating facility lease agreements as of the anticipated acquisition date of each project.

- “Lessor,” “Lease Term,” “Rent,” “Security Deposits,” “Extension / Renewal,” “Rent Revision,” “Termination,” “Termination Payment” and “Renewal Method” describe the content of the valid power generating facility lease agreement as of the anticipated acquisition date of the project.

j) “Characteristics of the Property” Column

“Characteristics of the Property” means information on the basic nature and characteristics of both the property and region in which each project to be acquired is located. The information is based on the technical report prepared by E&E Solutions, Inc., the Energy Yield Report prepared by TÜV Rheinland Japan, Ltd., along with partial information materials obtained from the Asset Manager. The reports are limited to the judgment and opinions of the expert authors at a certain point in time and the credibility and accuracy of the content is not

guaranteed. Environmental and other changes after the preparation date of each report are not reflected.

k) “Summary of the Project Valuation Report” Column

“Summary of the Project Valuation Report” is a summary of the project valuation report commissioned by CSIF and prepared by Japan Real Estate Institute for the project to be acquired by CSIF in accordance with various laws and ordinances such as the ITA, regulations set by The Investment Trusts Association, Japan and the method and criteria of asset valuation stated in the articles of incorporation of CSIF. The discount rate in the summary column assumes that the CSIF satisfies the conduit requirements of the Act on Special Measures Concerning Taxation (Act No. 26 of 1957, including subsequent amendments) and that its distributions can be included in deductible expenses.

Each valuation is limited to the judgment and opinion of the evaluator at a certain point in time and does not guarantee the validity, accuracy and possibility of transaction at the evaluated value.

There is no special conflict of interest between Japan Real Estate Institute, who has carried out the valuations, and CSIF and the Asset Manager.

l) “Summary of the Real Estate Appraisal Report” Column

“Summary of the Real Estate Appraisal Report” is a summary of the appraisal report commissioned by CSIF and prepared by Japan Real Estate Institute on the land to be acquired by CSIF in accordance with the laws concerning appraisal values of real estate, real estate standards specified by the Ministry of Land, Infrastructure and Transport and real estate appraisal standard operation notes. Each real estate appraisal is limited to the judgment and opinion of the appraiser at a certain point in time and does not guarantee the validity, accuracy and possibility of transaction at the appraisal value.

There is no special conflict of interest between Japan Real Estate Institute who has carried out the appraisal, and CSIF and the Asset Manager.

m) “Summary of the Status of Power Generation Over the Past Years” Column

“Summary of the Status of Power Generation Over the Past Years” is based on the numerical value and information provided by the current owner of each anticipated asset to be acquired. “Actual Amount of Sold Electricity” is calculated based on the numerical value measured through the supervisory control system for each anticipated asset to be acquired on the reading day of the meter in the given month. The calculation method of the amount of electricity sold may differ from the method CSIF will use after acquisition of each asset.

Status of power generation over the past years does not secure, guarantee nor predict future generation amounts.

CS Yamaguchi-shi Power Plant

S-31	CS Yamaguchi-shi Power Plant	Classification	Solar energy facilities etc.	
Summary of Asset				
Type of Specified Asset	Renewable energy facility, real estate etc.	Type of renewable energy facility		Solar energy facility
Anticipated Acquisition Date	December 1, 2023 (Note1)	Land	Lot number	12363-4
Anticipated Acquisition Price	¥230,000,000		Region Use	Outside of city planning area
Valuation of Power Plant (as of)	¥232,000,000 - ¥275,000,000 (October 1, 2023)		Area	10,065 m ²
			Land Rights	Ownership
Valuation of Land (as of)	¥60,900,000 (October 1, 2023)	Facility	Frame Structure	Screw pile foundation (Ramming method)
Location	Suzenji Aza Minamibara, Yamaguchi-shi, Yamaguchi		Certification Date	March 20, 2019
			COD	February 3, 2022
Operator	Canadian Solar Projects K.K.		Panel Type	Monocrystal silicon
			Panel Output	1,107.60 kW
O&M Servicer	Canadian Solar O&M Japan K.K.		Number of Panels	1,704
			Output Capacity	1,000 kW (Note2)
			Facility rights	Ownership
		Panel Manufacturer	Canadian Solar Group	
		Panel Model	CS7N-650MB-AG	

Summary of Specific Contracts	Power Generation Company	Yamaguchi Aio Futajima 2 G.K.
	Electric Power Purchasing Company	Chugoku Electric Power Company, Incorporated
	Purchase Price	¥18/kWh
Collateral Setting		None
Compliance with the risk management policy		As this property is a sole investment asset of CSIF and not a joint investment asset, risks associated with co-investors are not applicable to the risks specified in the risk management policy. In addition, other risks specified in the risk management policy, such as business risks, market conditions, economic conditions, demand volatility risk, demand and credit (limited users) risk of specific consumers (electric utilities and power generation companies), change in system risk, among other risks, fall under the risk management policy, but will be managed appropriately, in cooperation with the trustee, as stated in the risk management policy.
Public nature of the asset		<ul style="list-style-type: none"> • Contribute to the global environment through diffusion and expansion of renewable energy in Japan. • Contribute to the promotion of employment and activation of local communities. • Contribute to realizing a sustainable society by acquiring power generation equipment that forms the basis of energy circulation in the region.
Special Notes No applicable items.		

(Note1) The Purchase Agreement stipulates that the revenues and expenses of the property will vest in CSIF on and after December 1, 2023, the first day of the month in which the scheduled acquisition date falls.

(Note2) There is 95% constant power factor control.

Summary of Lease of Facilities etc.	
Lessee	CS Yamaguchi Aio Futajima 2 G.K.
Lease Period	From the date on which conditions, such as the acquisition of the power generating facilities by CSIF as the lessor (the “Lessor” for this item), are satisfied (the “Lease Commencement Date” for this item) to June 30, 2024.
Rent	<p>The rents payable by the lessee under the lease agreements will be the aggregate amount of (1) and (2) below.</p> <p>(1) Basic Rent (Note)</p> <p>Monthly forecast of the output based on the monthly projected energy output (P50) estimated by technical consultant in the lease term (however, for the month to which the lease commencement</p>

	<p>date belongs, it shall mean the projected energy output (P50) for the period from the first to the last day of the month) after deducting the projected energy output which takes into account the rate of output curtailment from third party research firm $\times 96\% \times 70\% \times$ FIT purchase price</p> <p>(2) Variable Rent</p> <p>(A) (Monthly actual energy output (however, for the month to which the lease commencement date belongs, it shall mean the actual energy output for the period from the first to the last day of the month) $\times 96\% \times$ FIT purchase price) – (B) basic rent for the relevant month</p> <p>(In any case, if the calculation of the variable rent is a negative number, it shall be deemed to be 0.)</p> <p>However, if the value (X) obtained by deducting (C) (the amount calculated by the formula below) from (A) becomes a positive value, and the amount of the Reversal (Y) (the amount remaining after deducting the cumulative amount of accumulation to compensate for the reversal from the cumulative amount of reversal. The same applies herein.) in the rent reserve account set forth in the memorandum of understanding regarding rent reserve dated October 1, 2022 (including subsequent amendments, hereinafter referred to as “Rent Reserve Memorandum”) between CSIF and the lessee is positive (i.e., when the value (Y) is not zero, i.e., when the reversal has been made and it has not been fully replenished.), the amount of the variable rent shall be (from (A) minus (B)) further minus (D), the smaller of (X) and (Y), to compensate for the above reversal.</p> <p>The Lessee shall accumulate the amount so deducted in the rent reserve account in accordance with the Rent Reserve Memorandum.</p> <p>(C) Monthly forecast of the output based on the monthly projected energy output (P50) estimated by technical consultant in the lease term (however, for the month to which the lease commencement date belongs, it shall mean the projected energy output (P50) for the period from the first to the last day of the month), minus the output curtailment rate estimated by the third-party research firm $\times 96\% \times$ the purchase price applicable to the power plant during the relevant month.</p> <p>* In the event that the revenue from electricity sales decreases and the lessee receives money from a third party as compensation relating to output curtailment, performance guarantee or profit insurance, etc., to compensate for the reduction, 96% of such money shall be added to (A) above and the difference between the recalculated variable rent of the applicable month and the money received shall be paid as compensation by the last day of the month following the month that the money is received. Where such compensation is money on which consumption tax and local consumption tax are not imposed (hereinafter referred to as “non-taxable income”), the non-taxable income shall be added to the amount on which the calculation of Variable Rent in the month where lessee's income decreased is based on, and if the calculated amount exceeds the amount paid from the lessee to the lessor, the amount of such excess shall be treated as inclusive of consumption tax and local consumption tax.</p>
Security Deposits	None
Extension / Renewals	The lease agreement will not be renewed. The lessee is required, upon a written request to renew the lease agreement by lessor at least 6 months prior to the expiration of the lease agreement, to enter into a new lease agreement with substantially similar terms (excluding rent; the lease term

	<p>shall be 1 year.). However, only for the first re-signing of this lease after the execution of the agreement, if the date of commencement of the lease is on or after 6 months prior to the expiration of the lease term, and if the lessor does not request in writing to the lessee that it does not wish to re-sign this lease, it shall be deemed that the request for re-signing has been made in accordance with the above and a new lease agreement with substantially the same conditions as this lease shall be executed. Rent amounts under each renewed lease agreement shall be in accordance with the terms below and determined by negotiations between the lessor and the lessee.</p> <p>The lessee will not be obliged to enter into a new lease agreement if, i) the lessor notifies the lessee of its intentions to renew the lease agreement after the 6-month period prior to the expiration (except for the proviso noted above), or ii) the lessor requests a new lease agreement that does not have substantially similar terms besides rent amounts or the rent amounts significantly differ from the terms below.</p> <p>Notwithstanding the above, the lessee shall have the right to refuse and not be obliged to enter into a new lease agreement if the request for renewal from the lessor is the first request after the 10th anniversary from the Lease Commencement Date regardless of the terms, provided that the lessee submits a written notice 3 months prior to the expiration.</p> <p>(1) Basic Rent: Monthly forecast of the output based on the monthly projected energy output (P50) estimated by technical consultant in the lease term after deducting the projected energy output which takes into account the rate of output curtailment from third party research firm $\times 96\% \times 70\% \times \text{FIT}$ purchase price</p> <p>(2) Variable Rent: (A) (Monthly actual energy output $\times 96\% \times \text{FIT}$ purchase price) – (B) basic rent for the relevant month</p> <p>(In any case, if the calculation of the variable rent is a negative number, it shall be deemed to be 0.) However, if the value (X) obtained by deducting (C) (the amount calculated by the formula below) from (A) becomes a positive value, and the amount of the Reversal (Y) for the payment of the basic bent in the rent reserve account set forth in the Rent Reserve Memorandum is positive (i.e., when the value (Y) is not zero, i.e., when the reversal has been made and it has not been fully replenished.), the amount of the variable rent shall be (from (A) minus (B)) further minus (D), the smaller of (X) and (Y) to compensate for the above reversal.</p> <p>The Lessee shall accumulate the amount so deducted in the rent reserve account in accordance with the Rent Reserve Memorandum.</p> <p>(C) Monthly forecast of the output based on the monthly projected energy output (P50) estimated by technical consultant in the lease term, minus the output curtailment rate estimated by the third-party research firm $\times 96\% \times$ the purchase price applicable to the power plant during the relevant month.</p>
Rent Revision	<p>Calculation methods for basic and variable rents during the lease term will not be changed.</p> <p>However, in the event that a part of the solar energy project is lost or cannot be used to generate revenue through force majeure events such as natural hazards or events that the lessor is</p>

	<p>responsible for, basic rent will be reduced in accordance with the ratio of the part of the solar energy project which is lost or cannot be used to generate revenue.</p> <p>At the time as stipulated above, if the lessor shows the basic rent amount calculated based on the formula with the remaining solar energy facilities is higher than that after the reduction as described above, the basic rent shall be the former amount.</p> <p>Furthermore, if the lessee's revenue after the deduction of monthly expenses or other costs does not meet the basic rent amount for the applicable month as a result of a force majeure event or an event the lessor or the lessee is not responsible for, the lessee will be able to request a negotiation for the reduction of basic rent (provided that the minimum limit of the basic rent after the reduction is the amount of electricity sales revenue minus the costs for the applicable month) and the lessee and the lessor shall hold such negotiations in good faith. In addition, if the lessee receives any money to compensate for the cause of the reduction of the electricity revenue, the lessee shall pay to the lessor the smaller amount between the reduction amount and the money received as the compensation for the reduction by the last day of the following month after such amount is received.</p> <p>In the event that it is deemed objectively unreasonable to maintain the basic rent due to important changes such as any legal changes to the FIT scheme (including the procurement price and procurement period) under the Act on Special Measures for Renewable Energy (including any amendment of the said law itself and revisions based on Article 3 Paragraph 11 of the said law) or changes to accounting treatment, the lessee will be able to request a negotiation for the reduction of basic rent and the lessee and the lessor shall hold such negotiation in good faith.</p>
Termination	None
Termination Payment	None
Renewal Method	None

(Note) The basic rent for the lease period from the commencement date of this lease to June 30, 2024 is a total of 9,931 thousand yen.

Characteristics of the Property			
■ Characteristics of the Property			
<Location>			
Project name	Location	Longitude / Latitude	Facility Size
CS Yamaguchi-shi Power Plant	Suzenji Aza Minamibara, Yamaguchi-shi, Yamaguchi	34° 4' 12" N 131° 26' 16" E	1,107.6 kW (photovoltaic cell) 1,000 kW (PCS) ※95% under constant power factor control
<Weather Conditions>			
<ul style="list-style-type: none"> • Annual daylight hours in Hofu is 2,045.4 hours, which is longer than the nationwide prefectural governed national average of 1,915.9 hours. • Maximum wind speed historically recorded was 25.1m/s, maximum instantaneous wind speed historically recorded was 39.6 m/s. • Yamaguchi's annual average maximum depth of snow is 9 cm. The maximum depth of snow recorded since 1966, the first year in which measurement results relating to snowfall were published, was 34 cm on January 25, 1968. Therefore, the effect of snow is minimal. 			

Summary of Project Valuation Report		
Asset name	CS Yamaguchi-shi Power Plant	
Valuation of Power Plant	¥232,000,000 - ¥275,000,000	
Evaluator	Japan Real Estate Institute	
Price as of	October 1, 2023	
Income Approach Method		
Item	Content	Summary etc.
Valuation	¥232,000,000 - ¥275,000,000	The discount rate is calculated by weighing the cost of equity and debt based on the target capital structure ratio of CSIF. The cost of equity is estimated based on the beta of similar companies in the solar power generation industry, while the cost of debt is estimated based on the most recent yields on Japanese corporate bonds. Based on the above, the discount rate (before tax) is calculated to be 3.1% to 1.9%.
Special items taken into consideration by the evaluating institution during evaluation	None	

Summary of the Real Estate Appraisal Report		
Asset name	CS Yamaguchi-shi Power Plant	
Valuation (Land)	¥60,900,000	
Real Estate Appraiser	Japan Real Estate Institute	
Price as of	October 1, 2023	
Item	Content	Summary etc.
Valuation by DCF method (facility and land)	¥,249000,000	Assessed by the total present value of the cash flow from the commencement of electricity sales for a certain period and return price (according to the fixed-term reduction method) of the solar energy facility and its site. Analysis period is 28years and 3months.
Discount Rate	2.7%	Appraised by adding/subtracting the spread attributable to the individual factors (market competitiveness) of the power plant in question to/from the standard discount rate for solar power plants, which was set based on the application of the feed-in tariff scheme, with reference to the decision-making process of market participants, which was determined based on interviews with investors, etc.
Integrated valuation by cost method (facility and land)	¥241,000,000	The land price is obtained, and the price of the structure is added to it to obtain the value of the structure and its site and assessed after examining factors related to the marketability of the land and the structure as a whole.
Land integration price ratio	24.4%	Cost method-based ratio
Special items taken into consideration by the evaluating institution during evaluation	None	

Summary of the Status of Power Generation Over the Past Year				
Applicable Period	From November 1, 2022			
	To October 31, 2023			
Actual Amount of Sold Electricity	November 2022	December 2022	January 2023	February 2023
	99,770 kWh	74,440 kWh	82,950kWh	92,080kWh
	March 2023	April 2023	May 2023	June 2023
	138,220 kWh	110,590 kWh	138,040 kWh	108,890 kWh
	July 2023	August 2023	September 2023	October 2023
	146,670 kWh	159,410 kWh	123,620 kWh	131,150 kWh

(2) Summary of Operator

The summary of Canadian Solar Project K.K., the operator of the Anticipated Acquisitions is as follows.

Name	Canadian Solar Projects K.K.
Location	43F Shinjuku Mitsui Building, 2-1-1 Nishi Shinjuku, Shinjuku-ku, Tokyo
Title and name of representative	Representative Director Michael Ryota Yamada
Content of business	Installation, operation and maintenance of facilities related to solar energy and other new energy, research and consulting, etc.
Capital	¥2,100 million (includes capital reserve) (as of December 31, 2022)
Date of Establishment	May 20, 2014
Net Assets	Undisclosed (Note)
Net Assets	Undisclosed (Note)
Major shareholder and shareholding ratio	Canadian Solar inc. (100%)
Relationship between CSIF / the Asset Manager and this company	
Capital Relationship	This company holds 14.64% of the investment units issued of CSIF as of June 30, 2023. In addition, this company is the parent (100% shares) of the Asset Manager and is a related-party to of the Asset Manager under the ITA.
Personnel Relationship	One officer is seconded to the Asset Manager from this company. One director and one auditor hold concurrent posts at the Asset Manager.
Business Relationship	This company has entered into a sponsor support agreement with CSIF and the Asset Manager. In addition, this company is the operator (as the prescribed person who determines matters concerning the management of investment assets stated in the securities listing rules and the enforcement regulations of the TSE) of all the owned assets based on the asset management outsourcing agreement executed with the lessees. In addition, this company is expected to be the operator of all the projects that are anticipated to be acquired by CSIF based on the asset management outsourcing agreement executed with the lessees.
Applicable situation to related parties	This company is a related party of CSIF and the Asset Manager. In addition, this company is a related-party stated under the ITA.

(Note) Information undisclosed as consent for disclosure by the Sponsor (Canadian Solar Projects K.K.) has not been obtained.

(3) Summary of Technical Reports and Energy Yield Report

CSIF has acquired Technical Reports on the system of the solar power generating equipment, evaluation of various contracts related to the solar power generating facilities, evaluation of the continuity (performance deterioration, environmental evaluation) among other things from E&E Solutions, Inc., and an Energy Yield Report from TÜV Rheinland Japan, Ltd., in relation to the Anticipated Acquisitions. The description of the seismic risk analysis report is the sole opinion of the author and CSIF will not guarantee the validity of its contents. E&E Solutions Inc. and TÜV Rheinland Japan, Ltd., are not related parties to CSIF and the Asset Manager.

Project number	Project name	Report Date (Note 1)	Projected Annual Energy Output (MWh) (Note 2)		Projected Capacity Utilization (%) (Note2) (Note3)		Projected Repairs (¥ thousands) (Note 4)
			1st year	10th year	1st year	10th year	
S-31	CS Yamaguchi-shi Power Plant	November, 2023	1st year	1,446	1st year	-	15,215
			10th year	-	10th year	-	
			20th year	-	20th year	-	

(Note 1) The “Report Date” shows the date of the “Projected Annual Energy Output” were based. The date of the “Technical Report” (please refer to (Note 4) for details.) prepared by E&E Solutions Inc. on which the figures for “Repair cost” are based is October 2023.

(Note 2) Projected annual energy output shows the annual figures for the years indicated using the P (percentile) 50 exceedance probability calculated based on a statistical analysis of solar irradiation data provided by government meteorological offices nearby as stated in the Energy Yield Report received from TÜV Rheinland Japan, Ltd., for the first year of operation.(In the Energy Yield Report received from TÜV Rheinland Japan, Ltd., only the assumed annual power generation figure for the first year of operation of the power plant is provided, and Projected Capacity Utilization is not given, so is omitted.) The data presented for the years indicated may differ from the actual data in the past, present and future. We expect the energy output to decline over the operating period of the solar energy project.

(Note 3) Projected capacity utilization is omitted because it is note stated in the Energy Yield Report received from TÜV Rheinland Japan.

(Note 4) “Projected Repairs” refer to expenses incurred in connection with major parts replacements over a 30 year period for the Anticipated Acquisition as stated in the technical report prepared by E&E Solutions, Inc.

(4) Summary of Seismic Risk Analysis

As a part of the due diligence process of acquiring assets, CSIF has engaged Tokio Marine dR Co., Ltd., to carry out seismic risk reviews. The PML value of the solar energy facilities due to earthquakes (probable maximum loss percentage) (Note) have been calculated based on information, such as the design and engineering drawings of the properties, among other factors, which take into account factors such as damage from ground-shaking, land liquefaction and tsunamis. The PML values in the seismic risk analysis report prepared by Tokio Marine dR Co., Ltd., are provided below. The description of the seismic risk analysis report is the sole opinion of the author and CSIF will not guarantee the validity and guarantee of its contents. Tokio Marine dR Co., Ltd., is not a related-party to CSIF and the Asset Manager.

Project Number	Project Name	PML Value (%)
S-31	CS Yamaguchi-shi Power Plant	Less than 0.1

(Note) “PML Value” refers to the percentage of the replacement price for the material loss, which is equivalent to the 90% non-exceedance probability, in the event of occurrence of earthquake ground motion (ground motion with a recurrence period of 475 years) with an exceedance probability of 10% over the next 50 years, which is considered to cause the greatest loss to a given facility or a group of facilities. The same applies herein.

4. Summary of Seller

(1) CS Yamaguchi-shi Power Plant (seller of land)

(1)	Name	CS Mie Yamada G.K.
(2)	Location	Shinjuku Mitsui Building 43F, Nishi Shinjuku 2-2-1, Shinjuku-ku, Tokyo
(3)	Title and name of representative	Representative Member Tida Power 12 G.K. Function Manager Ryota Yamada
(4)	Content of business	Development, acquisition, construction, ownership and operation of renewable energy facilities, purchase and selling of electricity and electricity generation
(5)	Capital	¥1 (as of September 25, 2023)
(6)	Date of Establishment	January 22, 2015
(7)	Net Assets	Undisclosed (Note)
(8)	Total Assets	Undisclosed (Note)
(9)	Major shareholder and shareholding ratio	Tida Power 12 G.K. (100%)
(10)	Relationship between CSIF / the Asset Manager and this company	
	Capital Relationship	There is no capital relationship between CSIF / the Asset Manager and this company.
	Personnel Relationship	There is no personnel relationship between CSIF / the Asset Manager and this company.
	Business Relationship	There is no business relationship between CSIF / the Asset Manager and this company.
	Applicable situation to related parties	This company is not a related party of CSIF and the Asset Manager. In addition, this company is not a related-party stated under the ITA.

(Note) Information undisclosed as consent for disclosure by CS Mie Yamada G.K. has not been obtained.

(2) CS Yamaguchi-shi Power Plant (Seller of facilities)

(1)	Name	CS Yamaguchi Aio Futajima 2 G.K.
(2)	Location	Shinjuku Mitsui Building 43F, Nishi Shinjuku 2-2-1, Shinjuku-ku, Tokyo
(3)	Title and name of representative	Representative Member Tida Power Holdings 6 Function Manager Hideyuki Ebihara
(4)	Content of business	Development, acquisition, construction, ownership and operation of renewable energy facilities, purchase and selling of electricity and electricity generation
(5)	Capital	¥11 (as of September 7, 2023)
(6)	Date of Establishment	October 4, 2019
(7)	Net Assets	Undisclosed (Note)
(8)	Total Assets	Undisclosed (Note)
(9)	Major shareholder and shareholding ratio	Canadian Solar Netherland Corporative U.A. (100%)
(10)	Relationship between CSIF / the Asset Manager and this company	
	Capital Relationship	There is no capital relationship between CSIF / the Asset Manager and this company.
	Personnel Relationship	There is no personnel relationship between CSIF / the Asset Manager and this company.
	Business Relationship	There is no business relationship between CSIF / the Asset Manager and this company.
	Applicable situation to related parties	This company is not a related party of CSIF and the Asset Manager. In addition, this company is not a related-party stated under the ITA.

(Note) Information undisclosed as consent for disclosure by CS Yamaguchi Aio Futajima 2 G.K. has not been obtained.

5. Status of Asset Acquirers

	Previous Owner (Previous Sublessor and Settlor of Surface Rights)	Owner before the previous owner (Sublessor and Settlor of Surface Rights)
Company name	CS Mie Yamada G.K. (Land) CS Yamaguchi Aio Futajima 2 G.K. (Solar Energy Facility)	A non-special related party
Relationship with special related-parties	A special purpose company belonging to the Sponsor Group (Note 1) and that the Sponsor has signed an asset management contract with.	-
Background and reason for acquisition	Acquired for the purpose of developing and investment management	-
Acquisition price	Undisclosed (Note 2)	-
Timing of acquisition (Note 3)	May 2017(Land) May 2022 (solar energy facility)	-

(None 1) “Sponsor Group” refers to (i) the Sponsor (Canadian Solar Projects K.K.), (ii) special purposes companies, partnerships, or other funds with which the Sponsor has executed asset management agreements (“SPC”), (iii) Canadian Solar O&M Japan K.K. (“CSOM JAPAN”), and (iv) special purpose companies, partnerships, or other funds in which the Sponsor or its subsidiaries own a majority interest. The same applies herein.

(Note 2) Omitted for the land as the previous owner has owned the land for more than one year. Omitted for the solar energy facility as the previous owner developed the property and has owned the facility for more than one year.

(Note 3) For land, the date of acquisition of ownership by the previous owner is stated based on the registry. For solar power generation facilities, the date of delivery is stated.

6. Transaction with Related-party

The sellers of the Anticipated Acquisitions are not Related Parties under the ITA or a Related Party under the Asset Manager’s related-party transaction rule. However, since 4 solar energy projects of Anticipated Acquisitions except for CS Kama-shi Power Plant were developed and owned by the Sponsor Group, etc, the Asset Manager follows the decision-making procedures in accordance with the related-party transaction rule and other internal rules and obtains the consent of CSIF based on the board of directors’ meeting of CSIF held today, in order to conduct the asset acquisition transactions with the sellers for the acquisition of 4 solar energy projects of Anticipated Acquisitions except for CS Kama-shi Power Plant.

The Asset Manager also follows the decision-making procedures in accordance with the related-party transaction rule and other internal rules and obtains the consent of CSIF based on the board of directors’ meeting of CSIF held today, in order to execute the solar project lease agreements, as the lessee of the Anticipated Acquisitions, Tida Power 01 G.K, is not Related Parties under the ITA, however, the lessee is a Related-Party under the Asset Manager’s related-party transaction rule.

In addition, the Asset Manager follows the decision-making procedures in accordance with the related-party transaction rule and other internal rules and obtains the consent of CSIF based on the board of directors' meeting of CSIF held today, in order to execute O&M outsourcing agreements with CSOM Japan, as CSOM Japan is a Related Parties under the ITA and related-party under the Asset Manager's related-party transaction rule.

7. Future Forecasts

The impact of the acquisition of the Anticipated acquisition on CSIF's overall earnings is expected to be minimal, Thus, There will be no revision to the Fund's operating forecast that CSIF announced for the Fiscal Periods Ending December 31, 2023 (13th fiscal period) and June 30, 2024 (14th fiscal period)".

(For reference) Earning forecasts for the current fiscal period and results for the fiscal period ended June 30, 2023

	Operating revenues	Operating income	Ordinary income	Net income	Distributions per unit (excluding distributions in excess of earnings)	Distributions in excess of earnings per unit	Distributions per unit (including distributions in excess of earnings)
June 30, 2023 (Actual)	¥3,452 mil.	¥1,256 mil.	¥1,003 mil.	¥1,003 mil.	¥2,595	¥1,155	¥3,750
December 31, 2023(Forecast)	¥4,472 mil.	¥1,665 mil.	¥1,148 mil.	¥1,147 mil.	¥2,539	¥1,211	¥3,750

Total			92,535	100.00	92,900	226,434.13	-

(Note 1) “Location” is based on the location of the land upon which the solar energy facility is installed, as described in the property registry.

(Note 2) “Median project valuation report amount or anticipated acquisition price” indicates the median project valuation report amount for owned assets and anticipated acquisition price for Anticipated Acquisitions. “Median project valuation report amount” is the median amount that we calculated based on the estimated values as of December 31, 2022 for the 25 solar energy projects CSIF currently own and as of July 1, 2023 for the Anticipated Acquisitions, provided to us by PricewaterhouseCoopers Sustainability LLC or Kroll, LLC, or the median project valuation amount in their project valuation reports, rounded down to the nearest million yen.

(Note 3) “Investment Ratio” is the value ratio of each property in relation to the sum of the total assets held and assets to be acquired rounded to the nearest second decimal place. Consequently, the total investment ratio of each property may not match the portfolio total.

(Note 4) “Panel Output” indicates the maximum PV module for each owned asset and each Anticipated Acquisitions based on the Technical Report received from E&E Solutions, Inc., or the Energy Yield Report received from TÜV Rheinland Japan, Ltd. As for the CS Takayama-shi Power Plant, an application for change certification has been filed due to changes in panel output caused by the replacement of decommissioned panels, etc. The figure in the column is after the change certification.
