Started offering Mercari Shops Linked App using API**

NE Inc. (Head Office: Odawara City, Kanagawa Prefecture; President and CEO: Noriyoshi Higo), 100% consolidated subsidiary of Hamee Corp., announced that NE has started offering the Mercari Shops Linked App jointly developed with its development partner, iTeles Corp. This enables API linkage between SaaS (cloud-based) EC Attractions "Next Engine" and the e-commerce platform "Mercari Shops" operated by Mercari Inc.

[Background]

Recently, Mercari has been focusing on strengthening the Mercari Shops, a B to C service that it launched in October 2021. As a result of this initiative, demand for system linkage has been increasing among clients of Next Engine. There was also a need for collaboration with integrated management systems, such as Next Engine, from clients who opened stores in Mercari Shops, so the two companies have collaborated to meet the needs of both clients, and this collaboration has been realized.

[About the future]

API linkage with Mercari Shops was realized with iTeles Corp., which has a result record of providing many Next Engine apps. In a turbulent commerce market environment, it is impossible to solve all the needs that arise solely with our own engineer resources. In anticipation of this, Next Engine has been actively establishing a partner ecosystem by disclosing API of the system at an early stage. As a result, we are able to flexibly and swiftly extend the functionality of this model.

Going forward, we will continue to build stronger partnerships and create new frenzy with everyone involved in commerce.
