With regard to key financial strategic indicators, we set as a growth indicator the annual growth target for adjusted EBITDA at more than 10%. For capital efficiency, we have set targets of ROIC of 15% or more and ROE of 20% or more as targets that significantly exceed the cost of capital (both on an IFRS basis). We set the criteria for soundness considering both a stock and flow perspective, stipulating that the net debt/equity ratio must be within one times, and the net debt/EBITDA ratio must be within 2 times. For the evaluation of the board's effectiveness in fiscal year 2022 (FY2022), we appointed a third-party evaluator (Board Advisors Japan, Inc.: BAJ) to conduct an external review, with the aim of enhancing the transparency and objectivity of evaluation. Specifically, BAJ carried out a questionnaire survey and individual interviews with all the board directors and executive officers, attended a board meeting as an observer, reviewed documents submitted to the board and the minutes of board meetings from the past two years, and produced a third-party evaluation report (hereinafter the "Evaluation Report") summarizing the results. In addition, the chairperson of the board conducted individual interviews with all the board directors. Then, based on the Evaluation Report and the findings from the interviews conducted by the chairperson of the board, the board identified issues that need to be addressed, deliberated about the direction of solving them, and compiled the final evaluation results.

2. Evaluation Method and Process

(1) The method and schedule of effectiveness evaluation were considered, and then reported to and deliberated by the board. (January 2023)

(April 2023)

the final results of the effectiveness evaluation. (May 2023)

3. Evaluation Results

After discussing the board effectiveness based on the Evaluation Report and the findings from the interviews conducted by the chairperson of the board, the board confirmed that the effectiveness of the board is ensured in terms of its composition, operation, culture and communication, discussion and oversight function, support systems, operation of committees, and relationship with investors and shareholders. We received the following comment from the third-party evaluator: "The board's effectiveness has steadily improved as a result of the establishment of a system for monitoring the current state of business operations and the diligent efforts made on both sides, i.e., oversight and execution." As characteristics underlying the effectiveness of the board, it pointed to: the board composition that ensures the independence and objectivity of the board; the appropriate delegation of authority to executive officers and the proper exercise of the monitoring function; a board culture that allows frank and open discussion; and the appropriate operation of committees.

Meanwhile, the board confirmed that its effectiveness has improved by properly addressing the issues identified in the effectiveness evaluation in FY2021. In addition, taking into account what has been pointed out by the third-party evaluator, the board identified issues that need to be addressed in the future in order to further enhance its oversight function.

(1) Progress in initiatives to address the issues identified in FY2021 board effectiveness evaluation

(i) Setting key agenda items that should be given priority in discussion at board meetings

In developing a new Mid-term Management Plan 2026 covering the upcoming three-year period, the board discussed purposes that serve as the basis of the plan as well as medium to long-term strategic policy, etc., and company-wide strategies (resource allocation across the business portfolio, capital policy, etc.). This led to a significant increase in the amount of time dedicated to discussing medium to long-term management strategies and company-wide strategies, from about 300 minutes in FY2021 to about 1,100 minutes. It is recognized that these efforts have produced some tangible results such as the development of the Mid-term Management Plan 2026 and the identification of eight areas of materiality, i.e., priority areas to focus efforts on in the years through 2026 toward realizing our group vision, "Work and Smile." At the same time, it is also recognized that there are some issues requiring further efforts. For instance, there is a need to further clarify the goals to be achieved under the Mid-term Management Plan 2026 and improve the method of monitoring the progress of the plan.

(ii) Composition of the board

The board and its committees considered the composition of the board that would have greater diversity in terms of gender and internationality in order to ensure diversity of perspectives aligned

with the changing external environment while keeping the size of the board unchanged. As a result, the board decided on, and proposed to the 15th annual meeting of shareholders, their appointment as board members.

(iii) Allocation of time to key agenda items and the management of meetings to foster meaningful discussions

To secure sufficient time to deliberate on priority agenda items, we strived to ensure the efficient management of board meetings, for instance, by simplifying explanations of agenda items for the purpose of information sharing at a meeting while enhancing briefings to individual directors. Although these efforts have produced some positive results, it is recognized that it is necessary to implement continuous improvement activities—such as changing the timetable for convening board meetings and further improving the quality of meeting materials—to foster meaningful discussions.

(2) Issues to be addressed in the future

(i) Setting key agenda items in line with the direction of medium to long-term management strategies

There is a need for the board to regularly discuss the direction of long-term management strategies from the perspective of both risks and opportunities. In setting this kind of agenda items, i.e., those that require a medium to long-term perspective, it is crucial to ensure beforehand that the board and executive officers have a shared understanding of issues with an eye on future changes in the social and business environments.

(ii) Monitoring business execution in a way conducive to corporate value

It is crucial to create a fully aligned understanding across the board as well as between the board and executive officers about the way in which the board should carry out monitoring, in working toward realizing "A 'Career Well-being' Creation Company," a vision of what we want to be in the future, as set forth in the Mid-term Management Plan 2026. Also, there is a need to discuss the necessity of changing the selection of monitoring targets and/or KPIs, as appropriate, in accordance with changes in the environment assumed in developing the Mid-term Management Plan 2026.

(iii) Securing sufficient communication opportunities between the board and executive officers

In solving the issues described above, there is a need to secure more communication opportunities between the board and executive officers as a basis for achieving a common understanding among them. To that end, it is necessary to: enhance opportunities for Independent Directors to gain a better understanding of the Company's management, business operations, and key persons; and increase opportunities for the board and executive officers to exchange frank opinions both formally and informally.

(iv) Further enhancing the management of board meetings to stimulate discussion

To secure sufficient time to deliberate on priority agenda items, it is necessary to achieve more efficient meeting management, for instance, by extending the length of board meetings, setting up an

opportunity for intensive discussion on a different day, and making effective use of written reports. To this end, it is important that in convening a board meeting, the chairperson of the board, the Lead Independent Director, and the secretariat to the board closely communicate beforehand on the management of the meeting. Also, it is necessary to change the format of meeting materials to promote substantive discussions by clarifying the points at issue.

Based on these evaluation results, the Company's board will continue to promote the PDCA cycle to improve its effectiveness and drive governance reform, so as to enable the PERSOL Group to realize sustainable growth and enhance corporate value.

(3) Training policy for Directors (Supplementary principle 4.14.2)

Directors are selected from amongst individuals who possess a broad knowledge of business/finance/organizations etc. Basic information (company outline, management strategy, financial strategy, priority audit items etc.) is shared with Directors when a Director is appointed. Furthermore, opportunities are provided to Directors to deepen their views by inviting external lecturers to talk on corporate governance etc.

This will continue to occur in future.

7. Sustainability initiatives

(1) Sustainability initiatives (Principle 2.3, Supplementary Principle 3.1.3, 4.2.2)

The company believe that we must identify materiality (key issue) that is essential for sustainable growth, incorporate these issues into our business plans, and act accordingly to address sustainability-related risks and opportunities which are likely to impact our management policies, plans and other activities. The eight materialities set for FY2022 (Creating work opportunities, Providing diverse work styles, Providing learning opportunities, Increasing productivity in business, Active roles of diverse personnel, Strengthening data governance, Respect for human rights, and Responding to climate change) have been incorporated into the Mid-term Business Plan 2026. We have set targets and KPIs for 2030, and the entire group will work together to achieve them.

Our materiality process and monitoring efforts to address material issues are posted on our website:

<https://www.persol-group.co.jp/en/sustainability/materiality/>

(2) Addressing climate change issues and disclosing information based on TCFD recommendations (Principle 2.3, Supplementary principle 3.1.3)

Regarding the issue of climate change, The Company has endorsed the recommendations of the Task Force on Climate-related Financial Disclosure (TCFD) and has started the disclosure of information about climate-related risks and opportunities for business based on scenario analysis from May 2022. The Company has also set a “Carbon-Neutral” target to reach zero greenhouse emissions in real terms from the energy used in our business activities by fiscal year 2030.

Through initiatives such as the promotion of energy conservation measures in the office and the use of renewable energy, we will strive to tackle the societal issue of climate change and achieve a carbon-neutral society. We will also consider setting additional carbon reduction goals that include scope 3 in or after fiscal year 2023.

8. Efforts for human capital investment

(1) Ensuring diversity in hiring of core human resources (Principle 2.4, Supplementary Principle 2.4.1,3.1.3)

PERSOL Group (hereinafter referred to as “the group”), under its Group Vision of “Work and Smile,” considers promotion of diversity as an important initiative upon aiming for the realization of a society where everyone can work and smile. The group, in January 2019, announced Diversity, Inclusion & Equality (hereinafter referred to as “DI&E”), the diversity policy of the group for realizing the vision, thereby establishing the basic concepts and set forth a policy to accept diversity of various values and leverage diversity of abilities. We will support the group members to constantly grow themselves by continuing to brush up and develop their own abilities. We provide an environment that facilitates synergy effects by improving workplace environment for all human resources and combining diversity of abilities.

The human resource development policy of the group focuses on “working individuals” and respects their diverse values. It attaches importance to all employees’ continuing to grow autonomously and developing human resources who play an active part even under the present highly uncertain business environment. Under this policy, the group has been conducting DI&E literacy training (e-learning; started in May 2019; a total of about 27,000 participants) and awareness reform training for all managerial staff (started in October 2021; held 19 times in total; about 2,300 participants). It also has been offering monthly in-house events to spread DI&E to promote development of culture that accepts diverse attributes and values such as female participation, sexual minorities, and age difference (started in July 2020; held 49 times in total; about 5,400 applicants).

The in-house environment development policy is to develop a workplace environment that is friendly for all employees. The group is developing such an environment by introducing a side job system that leads to growth of employees, realization of their visions, and social contributions as well as flexible working time and liberalization of dress code as a rule aimed at realizing a comfortable workplace environment, while establishing systems and offering trainings to enable employees to select workstyle that addresses their respective needs. The group also leverages telecommuting and the level of its utilization differs from company to company: the highest utilization ratio is 100% and 60% of our group companies shows that at the employees utilize it at least once a week. Reflecting diversification of their human resources, some of the group companies have introduced systems to enable employees to flexibly select the number of working days, hours, and place as well as leaves in order to respond to individual employees’ various needs such as child rearing, nursing of elderly, seeking higher studies, studying abroad, hobby and leisure activities, community activities, social activities, and health issues.

The group also follows the approach to accept and leverage diversity in employees’ promotion to management, which is the core of its business activities, and promotes personnel irrespective of the category with which the employee joined the company, their gender, or their nationality.

The ratio of female employees in management positions is about 24.4% for the group as a whole, compared with about 37% it aims to achieve in fiscal 2030. In September 2021, the group established Gender Diversity Committee to accelerate its concerted efforts for further promoting female participation. The group also promotes foreign employees to managerial positions based on the diversity concept irrespective of their nationality. Of about 530 foreign national employees of the group working in Japan, 20 have been promoted to managerial positions and the group intends to maintain the current level. The ratio of mid-career hires among employees in managerial positions exceeds 80% at group companies in Japan, and the group plans to maintain the current level, which is sufficient.

The group will continue to leverage viewpoints and values of its diverse human resources throughout the group thereby sustainably growing itself.

See the company website for the group's diverse human resources and its policy for human resource development.

Corporate Governance

Total (The amount of External Directors)	400	274	53	37	35	10
	(68)	(58)	(-)	(-)	(10)	(6)

Notes:

- 1) The information provided above includes one former director (non-member of the Audit and Supervisory Committee) who resigned mid-term.
- 2) The performance bonus targets set for three directors who are not members of the Audit and Supervisory Committee (excluding external directors) and actual performance results in the reporting fiscal year are as follows. Of the three directors, the chairperson of the Board ceased to be eligible for bonuses (short-term incentive compensation) at the close of the 14th annual meeting of shareholders on June 21, 2022. Thus, the bonus amount paid to the chairperson of the Board represents the amount applicable to the period from April through June 2022 (not including the amount applicable to the period from July 2022 through March 2023, which is based on the targets and actual results in the reporting fiscal year). As for financial performance measures applicable to the other two directors (i.e., those other than the chairperson of the Board), the Company achieved 1,060.8 billion yen in consolidated net sales and 48.1 billion yen in operating profit, respectively against the targets of 1,000 billion yen and 37.9 billion yen. As for non-financial performance measures, targets had been set for employee engagement and the percentage of women in managerial positions, of which the second target was achieved but the first one was not. The Company also identified and worked on specific areas that need to be addressed to improve business performance and corporate value. Based on these performance results, the coefficient for calculating the amounts of bonuses payable to the two directors, i.e., those other than the chairperson of the Board, was set at 143% to 156% against the baseline of 100%.
- 3) Of the share-based compensation, performance-linked medium to long-term incentive compensation (performance share) was not paid in the reporting fiscal year because it is linked to targets under the current Mid-term Management Plan.
- 4) Share-based compensation is stated in the amount of provision for allowance for share awards for directors (and other officers) recognized for the reporting fiscal year.
- 5) Of the directors who are not members of the Audit and Supervisory Committee, the chairperson of the Board ceased to be eligible for performance-linked medium to long-term incentive compensation, which is the performance share of the share-based compensation, at the close of the 14th annual meeting of shareholders on June 21, 2022. Thus, the amount of this compensation paid to the chairperson of the Board represents the amount applicable to the period from April through June 2022.
- 6) Compensation and other awards for individual directors are subject to deliberation by the Nomination and Compensation Committee, whose chairperson and majority of members are served by Independent Directors, and determined by a resolution of the Board. The Nomination and Compensation Committee submitted to the Board its recommendations on the compensation for individual directors for the reporting fiscal year, after detailed deliberations on the rationality of the process applied to determine compensation

for individual directors and other related matters. Specifically, the committee examined its compensation proposals for their consistency with the Company's policy on the determination of compensation for external directors, applied the evaluation results to the calculation formula after considering their reasonableness on an item-by-item basis, and confirmed the values calculated by the formula. After reviewing the process of deliberation and recommendations by the Nomination and Compensation Committee, the Board concluded that the recommended compensation for individual directors is consistent with the Company's policy on compensation for directors and executive officers stated above, as it properly reflects the performance in the reporting fiscal year.

2. Total consolidated compensation of internal directors who are not Audit and Supervisory committee members, etc.

Name	Total amount of compensation, etc. (JPY million)	Position	Total amount of compensation, etc. by compensation type (JPY million)

Takao Wada	115	Representative Director, President and CEO	65	26	18	5
Hirotohi Takahashi	104	Representative Director and Deputy President	60	23	16	4

Notes:

- 1) Share-based compensation is stated in the amount of provision for allowance for share awards for directors (and other officers) recognized for the reporting fiscal year.
- 2) The amounts of bonuses (short-term incentive compensation) and performance-linked medium to long-term incentive compensation, i.e., the performance share of share-based compensation, for Masamichi Mizuta, chairperson of the Board, represent the amounts applicable to the period from April through June 2022, because the composition of compensation for the chairperson was changed effective at the close of the 14th annual meeting of shareholders on June 21, 2022.
