Notice Concerning Inclusion in “A List” (the Highest Evaluation) in CDP Climate Change Program

Japan Prime Realty Investment Corporation (“JPR”) announces that it has been included in the A List, the highest evaluation, in the 2023 Climate Change Program.

Details

1. Overview of CDP

CDP is a global non-profit that runs the world’s environmental disclosure system for companies, cities, states and regions. Founded in 2000 and working with more than 740 financial institutions with over \$136 trillion in assets, CDP pioneered using capital markets and corporate procurement to motivate companies to disclose their environmental impacts, and to reduce greenhouse gas emissions, safeguard water resources and protect forests. Over 24,000 organizations around the world disclosed data through CDP in 2023, with more than 23,000 companies – including listed companies worth two thirds global market capitalization - and over 1,100 cities, states and regions. CDP has the world’s largest environmental database based on the TCFD (Task Force on Climate-related Financial Disclosures), and its CDP score is widely used in making investment and procurement decisions to build net zero, sustainable and resilient economies.

For more details about CDP, refer to its website. (<https://www.cdp.net/en>).

2. Assessment Result

The CDP evaluations are scored on eight levels: leadership level (A, A-), management level (B, B-), awareness level (C, C-) and information disclosure level (D, D-). This is the fourth time for JPR to participate in the program, and it was recognized in the 2023 evaluation for its leadership in transparency and performance in the field of climate change, receiving the highest score of “A” and becoming a climate change “A List” company for the first time.
