## **Notice Concerning the Possible Loss Arising from Business Activities (Update to Disclosed Matters)**

OSAKA SODA Co., Ltd. (the “Company”) hereby announces the current status and future outlook regarding the “suspension of some production facilities due to manufacturing equipment problems at our Mizushima Plant,” as disclosed on April 25, 2023.

### 1. Current status

Regarding the malfunctions of the main equipment for the Allyl Chloride production facility that occurred on April 4, 2023, as stated on November 29 of the same year, production has been restored to 70% of its original level since November 21, and stable operation has been achieved.

### 2. Future outlook

While full repair of the main equipment was scheduled to be completed during the regular maintenance in March 2024 as originally planned, it is now expected that full repair will take place at the end of June 2024 due to delays in the delivery of main equipment components.

Furthermore, taking into consideration the business environment to date and the future outlook, there will be no changes to the previously announced consolidated financial results for the fiscal year ending March 31, 2024.

We apologize for any inconveniences caused to everyone concerned.
