The Company operates in line with all the principles of the Corporate Governance Code.

[Disclosure Based on the Principles of the Corporate Governance Code] - Updated

Principle 1.4 Cross-shareholding of Listed Companies

1. Policy on cross-shareholdings

The Company does not hold the shares of related parties and business partners unless there is reasonable to maintain cross-shareholdings for the purpose of strengthening the Company’s business and functions. Every year, the Board of Directors examines the shares of listed companies that it owns to verify the qualitative reasons for holding each individual stock (background behind purchase, stable supply of raw materials or use of distribution routes, joint development, and other transactional plans, etc.) and the quantitative benefits anticipated from acquisition (confirmation of economic rationale), to comprehensively verify the rationality and need to own these shares. To verify the economic rationale for holding the shares, the Company compares the business revenues, the increase in BPS

and dividends of the issuer whose shares have been acquired to the Company's targeted ROE benchmark of 8% and evaluates these factors.

The Company will gradually reduce cross-shareholdings to less than 10% of net assets after discussion with business partners and will use the funds to invest in growth, as decided in the Group Medium-term Management Plan 2025, even in the case of shares which have been deemed to meet the economic rationale standard as determined above.

2. Examination of cross-shareholdings

At the Board of Directors meeting held on September 27, 2022, the Company's Board of Directors examined the stocks owned for the purpose for cross-shareholding and decided on a plan to sell four stocks, including stocks deemed to be held. All stocks the Company continues to hold were confirmed as being held for the purpose of increasing economic profit from the medium to long-term perspective of the Group, based on the verification discussed above. Sale of the four stocks mentioned above has already been completed.

As of the end of FY2022, the Company holds 46 listed stocks, including three stocks deemed to be held.

3. Criteria for exercising the voting rights of cross-shareholdings

The Company exercises the voting rights of cross-shareholdings following a comprehensive judgement based on confirmation of the following two points, regarding proposals presented. The Company engages in dialogue with the respective company in case further confirmation is necessary, such as checking the details of a proposal, etc.

- (1) Does it contribute to the medium- to long-term enhancement of the company's corporate value?
- (2) Does it go against the purpose of the Company's cross-shareholding?

Principle 1.7 Related Party Transactions

Competing transactions and transactions involving conflict of interests with Directors must be approved by the Board of Directors. In addition, transactions with major shareholders with a high degree of materiality also require approval by the Board of Directors. Furthermore, the results of related party transactions are reported to the Board of Directors.

Supplementary Principle 2.4.1 View on Ensuring Diversity in Promotion, etc. and Disclosure of Human Resource Development Policy, etc.

The Megmilk Snow Brand Group promotes women's active participation in the workplace as a corporate strategy. This is at the core of Group efforts to ensure diversity of human resources.

We will continue to strive to develop human resources, achieve work-life balance, and improve work productivity as we strive to achieve even greater diversity in the future.

Megmilk Snow Brand Report 2022 (Integrated Report) contains a concrete description of initiatives.

Principle 2.6 Roles of Corporate Pension Funds as Asset Owners

The Company administers pension fund assets according to a basic policy of asset management set forth in regulations in order to secure the total earnings needed for employees' retirement benefits over the medium- to long-term.

Material matters related to the asset management of pension assets are discussed by the Corporate Pension Administration Committee whose members are comprised of the president, executive officer responsible for human resources, and executive officer responsible for finance.

In selecting the investment institution to act as trustee, the Company makes decisions considering the investment philosophy and asset management structure comprehensively. Investment institutions are required to provide a report on asset management results regularly and the Company conducts regular monitoring of matters including the implementation of stewardship activities.

Regarding conflicts of interest in the management of the fund's assets, it is prohibited to conclude the Asset Management Operation Agreement for the purpose of pursuing the interest of third parties other than the Company and its members. Conflicts of interest are managed appropriately by entrusting the asset management institution to decide on how to exercise voting rights.

[Response Targeting Realization of Management with Awareness of the Cost of Capital and Stock Price (under consideration)]

We recognize that having a price to book ratio (PBR) below 1 is problematic, and think it does not indicate the profitability and growth needed to have investors value Company shares.

On May 15, 2023, the Company announced the establishment of Megamilk Snow Brand Group Medium-term Management Plan 2025.

The theme of this medium-term management plan is “Gain Resilience.” We will demonstrate our position on Group growth through initiatives in the three pillars of “Creating seeds for new growth,” “Expanding quantity by utilizing platform,” and “Strengthening and supporting domestic dairy farming production platform,” and will target enhancement of corporate value and appreciation of the Company’s stock price by improving profitability and asset efficiency through the implementation of such initiatives. Our goal is to quickly achieve an ROE of 8% and a PBR higher than 1 through these initiatives.

The status as of the second quarter of FYE3/2024 was as follows:

Profitability: Profitability is steadily improving due in part to price revisions. New product launches that will help improve profitability are disclosed in a timely manner.

Growth: We plan to disclose the status of investment in creating future value and other initiatives in the medium-term management plan when financial results are announced in May 2024.

Reducing cross-shareholdings: We are making progress on discussing this with our business partners and are working to reduce cross-shareholdings to less than 10% of net assets during the medium-term management plan period. If share sales have a substantial impact on financial performance, we will disclose this in a timely manner.

[Status of Dialog with Shareholders, etc.]

The Company discloses the status of dialogs with shareholders and other stakeholders on our corporate website.

At the Board of Directors meeting held on February 24, 2021, Megmilk Snow Brand decided to adopt the Policy on Decisions on Compensation for Individual Directors, and then revised it at the Board of Directors meeting held on May 15, 2023. These resolutions of the Board of Directors are discussed in advance by the Compensation Advisory Committee, which is mainly composed of independent external directors. In addition, the Board of Directors confirmed that decisions on the content of the compensation for each individual director for the fiscal year under question as well as the content of the compensation decided is consistent with the policies on such decisions, and that the discussion in the Compensation Advisory Committee has been respected. Accordingly, the compensation is consistent with this policy. The policy related to decisions on content of compensation for individual directors is as follows.

(1) Basic Policy

- 1) The compensation for directors (excluding directors who are Audit & Supervisory Committee Members) is within the range resolved by the General Meeting of Shareholders. This level is benchmarked against compensation at other manufacturers and food companies of a similar size and amounts are determined based on the Company's performance. Compensation for each position reflects the weight of work responsibilities and the extent to which they contribute to and achieve the Group's consolidated earnings results. The compensation for directors who are Audit & Supervisory Committee Members is within the range resolved by the General Meeting of Shareholders. This level is set at an appropriate amount in comparison with other companies of the same size based on an external survey.
- 2) The compensation consists of base compensation and performance-linked compensation. Base compensation consists of a salary for oversight as compensation for overseeing management and an executive salary component for the execution of operations.

Performance-linked bonuses consist of a short-term incentive (cash bonus) that is determined based on the consolidated operating profit for the Megmilk Snow Brand Group and a long-term incentive (stock based compensation) based on the financial indicators related to the Group's medium- and long-term performance.

(2) Policy on Setting the Ratios for the Compensation for Individual Directors

The ratio of the base compensation, short-term incentive (cash bonus) linked to performance and long-term incentive (stock-based compensation) is approximately 6:2:2 (in the event that earnings indicators for the performance-linked bonus are achieved).

(3) Policies on Deciding on the Substance, Amount and Calculation Methods for Performance-linked Compensation and Non-financial Compensation

1) Short-term incentive (cash bonus)

This is paid as an incentive in line with the extent to which the Group's consolidated earnings are achieved in each fiscal year. The earnings indicator is the Group's consolidated operating income.

2) Long-term incentive (stock-based compensation)

The earnings indicators linked to performance are EBITDA and ROE, which assess improvements in profitability and capital efficiency.

When including the portion not linked to performance, the weighting is 4:4:2 for EBITDA, ROE, and the portion not linked to performance, respectively (if each performance indicator is achieved).

(4) Policy for Setting Timing and Conditions for Payment of Compensation to Directors

1) Base compensation: The monthly amount is set and paid on the salary payment date for employees.

2) Performance-linked compensation, short-term incentive (cash bonus): Paid within one month after the completion of the regular general meeting of shareholders

3) Performance-linked compensation, long-term incentive (stock-based compensation): Paid separately based on internal regulations on stock issuance

(5) Matters Related to Decisions on Content of Compensation for Individual Directors
