2. Reason for the Selection of the Asset to be Transferred

- i. NIPPON REIT recognizes that it is an essential strategy to implement asset replacement at the right time in order to maintain and improve portfolio competitiveness from a medium-to long-term perspective while expanding AUM.
- ii. The assets to be transferred were selected based on "Tiering-PJ" analyses which is conducted annually as part of the Asset Manager's medium-to long-term management strategy. In order to maintain and improve portfolio competitiveness with a view to manage in a medium-to-long-term perspective of (a) optimizing capex plan based on the building age, and (b) eliminating concerns about a decline in internal growth potential in property analysis on profitability, liquidity and property characteristics. As a result, the transfer price from the transferee will be lower than the appraisal value (end of December 2023). However, the Company believes that reinvestment in properties that can be expected to generate stable earnings in the future, which will lead to an improvement in the quality of the portfolio, will maximize unitholder value, and has decided to transfer it based on its future outlook.

Depending on a specified asset, there are cases where “Building coverage ratio” and “floor area ratio” are subject to certain relaxation measures or restriction measures. In addition, where there are several floor area ratios that apply to a site, the floor area ratio is stated by converting to one that applies to the entire site.
- “Use district” of land is the type of use district listed in Article 8, Paragraph 1, Item 1 of the City Planning Act.
- “Site area” of land is based on that stated in the registry and may differ from the present state.

- “Appraisal value” is the appraisal value stated in the appraisal report prepared by Japan Real Estate Institute and rounded down to the nearest million yen. The appraisal value does not guarantee the possibility of acquisition or disposition with the price. Furthermore, there is no special interest among the Appraiser, NIPPON REIT and the Asset Manager.
- “PML” is the PML (Probable Maximum Loss) calculated in the evaluation of seismic risk analysis conducted by Tokio Marine dR Co., Ltd. as requested as part of due diligence upon acquisition of the real estate trust beneficiary right by NIPPON REIT, and rounded to one decimal place. Furthermore, “Probable Maximum Loss” means the probable maximum loss that may result from an earthquake and, herein, refers to the extent of damage that may be suffered due to an earthquake of the assumed maximum scale (earthquake with a probability of occurring once in 475 years = earthquake with a 10% probability of occurrence in 50 years) in the assumed scheduled use period (50 years = useful life of a general building), expressed as the estimated cost of restoring such damage as a percentage (%) of the replacement cost.

Furthermore, because there are cases where leased floor space indicated in lease contracts, etc. includes the portion not included in total floor space, there are cases where total leased floor space may exceed total floor space.
- “Occupancy rate” is the ratio of the leased floor space to the leasable floor space for the Property at each date stated, and rounded to one decimal place.
- “Total number of tenants” is the sum total of the number of tenants in the lease agreement of the Property indicated in each lease agreement for the Property as of the end of December 2023. In cases where a master lease agreement is scheduled to be concluded for the concerned asset, the sum total amount of tenant leasehold and security deposits required based on the lease agreement concluded with end tenants, and rounded down to the nearest million yen is stated. If consent on disclosure is not obtained by the end tenant, the description in the “Deposits, etc.” column is omitted.
