Notice Concerning the Result of CDP Scoring (A-) for Climate Change 2023 Reporting

DTS CORPORATION (“DTS”) hereby announces that it has earned a Leadership-level score of “A-” in the assessment of climate change 2023 reporting by CDP, an international non-profit organization that operates an environmental disclosure platform.

CDP is an international non-profit organization that scores and discloses the environmental efforts of companies and local authorities. In 2023, a total of 25,000-plus organizations—including over 23,000 companies representing two thirds of global market capitalization and more than 1,100 cities, states and regions—disclosed environmental information through CDP questionnaires. By responding to surveys in “Climate Change,” “Water Security,” and “Forests” categories, participants are rated on an eight-point scale of Leadership (A/A- score), Management (B/B-score), Awareness (C/C- score), and Disclosure (D/D- score).

Climbing one notch from the “B” score it earned last year as a first-timer, DTS achieved an “A-” score, which is given to companies that demonstrate best practice in addressing climate change.

DTS is committed to responding to the demands for further improvement in transparency by continuing disclosure through CDP.

■Environmental initiatives of DTS are reported in its integrated report, “DTS Group Report 2023.”
