Overseas Wi-Fi Router Rental Service “GLOBAL WiFi®”
adds 23 countries to its Ultra-high-speed Unlimited 5G Service Area
including Singapore and India

Vision Inc. (Head Office: Shinjuku-ku, Tokyo President, Representative Director and COO: Kenji Ota, hereinafter “Vision”), a provider of “GLOBAL WiFi®” (<https://townwifi.com/>), which is a low-priced and high-quality overseas Wi-Fi router rental service, has added 23 countries listed below to its Ultra-high-speed 5G coverage area from March 26.

As a result, GLOBAL WiFi now offers 5G in 35 countries and regions.

We will continue to expand the service area as soon as it is ready.

5G Unlimited plan
Now available in 23 new countries!

Asia	Europe	
UAE	Iceland	Ireland
India	Netherlands	Austria
Singapore	Greece	Croatia
Philippines	Sweden	Slovenia
Malaysia	Czech Republic	Hungary
	Finland	Bulgaria
	Portugal	Malta
	Luxembourg	Romania

Oceania
Australia
New Zealand

In order for our users not to worry about their data capacity, we have started offering “Unlimited Plans” through our Ultra-high-speed 5G service, which doesn’t set any limits on their daily data usage.

We will continually put our efforts on improving service quality, network quality, and area coverage, which includes the recent expansion of the Ultra-high-speed 5G service area, aiming to provide a comfortable mobile connectivity for tourists and business travelers around the world.

Luxembourg: 3,370 yen (Early booking discount [*] 3,170 yen)

[*] Early booking discount applies within the designated application period. For details, check our website.

Precautions:

- Plan provides data communications even without an 5G connection by switching to 4G.
- 5G may be unavailable due to local circumstances; in such cases, 4G only is provided.
- Because the plan uses the most up-to-date devices, customers can expect higher communication speeds compared to previous 4G devices, even when connecting via 4G.
 - * Varies depending on location.
- If data volumes become excessive, connectivity may be restricted depending on the policies of partner carriers at the destination country or our own assessment.

• **About Vision’s “communication quality” standards and “signal audits”**

Under “GLOBAL WiFi®,” Vision provides global high-speed mobile communications based on information updates and verifications conducted in collaboration with partner communications carriers around the world. When adding coverage areas, communication methods, and plans, we also verify locations with “signal audits”. After verifying the extent of the coverage area (signal area), including dead spots and locations where signals are blocked by buildings, etc., we measure actual communication speeds. Only if these measurements meet our own communication quality standards do we begin purchasing communications bandwidth. The verification is undertaken by our own overseas staff and partner companies in some areas. There are many 5G communications carriers around the world, but at Vision, we only begin providing service in areas that meet our quality standards.
