**(Progress of disclosure matters) Notice Concerning the Impact of
the 2024 Noto Peninsula Earthquake**

Olympus Corporation ("Olympus") hereby announces the following update on the impact of the earthquake on the Olympus group. The announcement was originally made in the timely disclosure "Notice Concerning the Impact of the 2024 Noto Peninsula Earthquake" dated February 9, 2024.

1. Current condition

(1) Suppliers of production parts and materials

With strong support from many stakeholders, the primary supplier resumed production in the middle of March 2024, and production levels are gradually recovering. We also have been able to further accelerate production by a second supplier.

(2) Our response

Due to the resumption of operation by the primary supplier and the increase in production by the second supplier, Olympus group is currently increasing its production capacity. Production of new endoscope products will gradually be brought back to normal from April, and operation will resume as usual in early May.

2. Future Outlook

As we announced in our timely disclosure of March 1, 2024, "(Progress of disclosure matters) Notice Concerning the Impact of the 2024 Noto Peninsula Earthquake", although the temporary decrease in consolidated revenue due to the decreased production is expected to be less than forecast as of February 14, the financial impact for the fiscal year ending March 31, 2024, are currently under review. In addition, the impact of financial results for the fiscal year ending March 31, 2025, is expected to be immaterial.

If any future event which requires disclosure arises, we will announce it promptly.
