[Monthly comment]

In March, net sales totaled 108.9% for existing stores compared with the previous year and 120.9% for all stores.

Even though temperatures throughout the month were lower than during the average year, sales of spring apparel and high-unit-price apparel were strong, sales of home appliances which captured seasonal demand from people beginning new chapters in their lives were favorable, and sales of household items and hobby-related items were favorable. Due to these factors, sales for both existing stores and all stores increased year on year.
