Appointment of Director of Bitcoin Strategy

The Company is excited to welcome Dylan LeClair as Director of Bitcoin Strategy. Being a prominent advocate for bitcoin adoption as a solution to fiat currency debasement, Dylan brings expertise in bitcoin and macroeconomic analysis, positioning him as an invaluable addition to the team.

Dylan brings critical industry experience from his role at UTXO Management, a bitcoin-focused hedge fund, where he developed allocation strategies for the liquid fund. His research, published in Bitcoin Magazine, provides quantitative insights into global bitcoin adoption trends.

At Metaplanet, Dylan will spearhead the strategic corporate bitcoin strategy, leveraging all available tools in public capital markets to achieve accretive bitcoin accumulation for the corporate balance sheet and align with Metaplanet's long-term vision of advancing Bitcoin's role in the global economy.
